RAILWAY FROM 3 YEARS

The Wooden Railway is a favorite of children—and parents! Its quality, play value, and simplicity of design make it appealing and safe for all ages.

The interchangeable, reversible railway track is made of select beechwood. It interlocks easily and smoothly to form many different configurations. The trains are lacquered in bright, vivid colors with a chip-resistant, high-gloss finish. The magnetic couplings are safe and simple to connect.

RAILWAY FROM 3 YEARS

The Railway calls for the total involvement of children. It touches their physical, cognitive, social, and emotional selves and they experience themselves and their wholeness.

Physically children use their fine motor skills to connect the track, couple the railway cars, set up the layout, and manipulate the many parts and accessories. Their eye-hand coordination and balancing skills are refined. Their sensory response to seeing and touching helps them develop an aesthetic appreciation of materials and design.

Cognitively children deal with spatial relationships and design. They plan and concentrate as they figure out how things go together. They learn that their actions have consequences. They develop cognitive strategies for processing information and for problem solving.

Socially, children of all ages play, interact, share, and cooperate around the railway. Imitation, role-playing and fantasy become an integral part of railway play. They create their own town or world and let their imaginations soar.

Emotionally, children experience themselves and realize their capabilities. They experiment and discover, fail and succeed, practice and master. They develop feelings of competence and confidence as they play.
